## OBJECTIVE

---

I have a solid background in building responsive and scalable websites using the latest tools and tech. I'm excited to join a team where I can make a real impact, bring creative solutions to real-world problems, and keep learning new skills. I'm a software engineer who's passionate about using technology to make a difference.

## SKILLS & ABILITIES

---

**Frontend:** HTML, CSS, Bootstrap, TailwindCSS, React, Angular

**Backend:** Node.js, PHP, Firebase

**Databases:** MySQL, MongoDB

**Frameworks:** Laravel, Vue.js

**Version Control:** Git, GitHub

**Programming Languages:** JavaScript

**Other Skills:** RESTful APIs, Authentication & Authorization

## PROJECTS

---

Cloned Portfolio site

### Cloned Udemy

I built a fully responsive website similar to Udemy using React and Bootstrap. The design focuses on a smooth user experience, like a real online learning platform. Key features include course listings, filtering options, and easy navigation, making it feel like a real e-learning site.

Personal Portfolio Website

### Food Ordering App

I created a complete food ordering app using Angular, PHP, and MySQL. The app includes features like menu displays, order management, and a responsive design for a smooth user experience. I set up a MySQL database to manage user orders and inventory, and used PHP for server-side functions.

## EDUCATION

---

### **SQL, 2023-present**

#### **SQL College of ICT**

Software Engineering (Full-Stack) 2015- 2017

#### **Kwara State Polytechnic**

Leisure and Tourism management (National Diploma)

### **2018- 2021**

#### **Federal College of Wildlife and Eco-tourism Management**

Leisure and Tourism management (Higher National Diploma)

## COMMUNICATION

---

I communicate well both in writing and speaking, and I work effectively with others on a team. I can explain technical details in a way that everyone can understand and actively contribute to group discussions.
